5. Cleaning the workplace.	5.3 Hygiene - Handwashing, Sanitation facilities and tollets.	Employees not using correct hygiene measures and sanitising practices.	1. Using signs and posters to build awareness of good hand washing technique. 2. Provision of washroom and toilet wash facilities. 3. Providing hand sanitiser in multiple locations in addition to washrooms. 4. Setting clear use and cleaning guidance for toilets to ensure they are kept clean and social distancing is achieved as much as possible. 5. Increase handwashing frequency. 6. Employees advised to avoid touching your face and to cough or sneeze into a tissue which is binned safely, or into your arm if a tissue is not available.	20	Where possible, providing paper towels as an alternative to hand dryers in handwashing facilities. Providing more waste facilities and more frequent rubbish collection.	20	The correct hand washing techniques requires the individual to wash their hands continuously for 20 seconds. Refer to Government Guidance on Working safely during COVID-19, for possible additional site specific controls
5. Cleaning the workplace.	5.5 Handling goods, Merchandise and other materials and onsite vehicles.	Handling of shared equipment that has not been sanitised.	Cleaning procedures for the parts of shared equipment you touched after each use (vehicles, pallet trucks). Using drop-off points or transfer zones. Increased handwashing and introducing more hand washing facilities. Regular cleaning of reusable delivery boxes.	20	Increased schedule for company vehicle cleaning. Use of face covering.	20	Managers should check hygiene measures are being adhered to. Refer to Government Guidance on Working safely during COVID-19, for possible additional site specific controls.
6. Personal Protective Equipmer (PPE) and Face coverings.	6.1 Working in close proximity of other employees.	Work activity is unable to be carriedout following social distancing controls ie team lifts, working in containers resulting in possible cross contamination.	1. Where you are already using PPE in your work activity to protect against non-COVID-19 risks, you should continue to do so. 2. A face covering needs to cover your mouth and nose to be effective. 3. Wash your hands thoroughly with soap and water for20 seconds or use hand sanitiser before putting a face covering on, and after removing it. 4. When wearing a face covering, avoid touching your face or face covering, as you could contaminate them with germ from your hands. 5. Change your face overing if it becomes damp or if you've touched it. 6. Continue to wash your hands regularly. 7. If the material is washable, wash in line with manufacturer's instructions. If it's not washable, dispose of it carefully in your usual waste.	20	Introduce mandatory face coverings for some tasks (manual handling requiring 2 operatives).	20	Manages should check any additional PPE requirements if introduced are adhered to. Additional PPE must be fit for purpose and fit correctly. Refer to Government Guidance on Working safely during COVID-19, for possible additional site specific controls 4. The evidence suggests that wearing a face covering does not protect you, but it may protect others if you are infected but have not developed symptoms.
